

Create a “Video Poker” game with C# (preferred option) or Java. The game should deal five cards and the player has the opportunity to discard one or more cards. Discarded cards are replaced with the new ones. After the draw evaluate the current combination. Different combinations should pay out a different prize (see in the table below).

The UI should be a Console application. Focus on good code design and good practices, UI design should be minimalistic and simple.

Prize table:

Hand	Prize
Royal Flush	800
Straight Flush	50
Four of a kind	25
Full House	9
Flush	6
Straight	4
Three of a kind	3
Two Pair	2
Jacks or Better	1
All other	0
